During the prevalence of a gripe those who made use of Ayer's Cherry Pectoral found it prompt to rest and sure to cure. No other medicine so safe and successful in all diseases of the throat and lungs, and the only remedy successful in consumption.

The first man who ever sang a Negro song on the stage was an actor named Herbert. He sat in a chair before the curtain. He painted his face with black paint, burnt cork, and then sang.

Her mother was one of Uncle Sam's pensioners, who died about a year since. After her death Henrietta held hold of the pension certificate of \$300 month, and kept right on drawing the money.

To do this she of course had to commit the double crime of forgery and perjury. The authorities caught on, and Henrietta was tried in the Federal Court at Covington.

Receiving a sentence of two years in the Penitentiary.

This is her second trip to that institution, she having been sent up some years ago for killing a circus man at her house in the Fifth Ward, but she was pardoned because it was said she was dying of consumption.

ATTEMPTED LAID DELIVERY.
The Work Was Discovered in Time to Prevent Escape.

They didn't get there! But it wasn't their fault!

Between Saturday midnight and daylight Sunday morning there was some good work done by a lot of occupants of the lower floor of Jailer Johnson's Jug.

Those who had the range of this floor were "Red" Costello, charged with shooting; William Son, under sentence of two years for housebreaking; "Sheep" Lewis and Morris Lewis, adultery; Bill Clark and Bill Rake, grand larceny; Walter Skinner and Shelby Setters, having burglar tools in their possession.

It is not thought that anything like the whole number of the foregoing had a hand in the work, but those who did engaged had "been there before."

The tools used were a carpenter's chisel, a stone about the size of a man's fist, and a bar of iron nearly three inches wide, half inch thick and nearly four feet long.

How these tools got into the Jail is now the subject of investigation.

Yesterday Jailer Johnson "got onto" the scheme.

And examination disclosed the fact that considerable headway had been made toward cutting out one of the narrow gratings that are in the stone floor of the corridor, and which serve as ventilation for the cellar.

If it had been once removed access to the cellar was assured, and thence to the open air was an easy matter.

The "work" had been carefully covered by a blanket, in hopes that it would not be discovered, and if it had not been the tools would undoubtedly have completed the job last night.

Constable Coughlin found the large iron bar concealed beneath one of the radiators in the hall, while the chisel and stone were found in another part of the building.

There are besides these two Populists, Horace J. Poore of Pendleton county, who is counted on by the Republicans, and W. J. Eldridge of Callaway county, who will probably vote with the Democrats.

This will make the vote sixty nine each on joint ballot.

A deadlock will exist unless at least one of the contesting Republicans unseats his Democratic opponent.

Congressman McCreary's friends are greatly excited, asserting that he has the pluck of one of the Populists.

But even the Blackburn men are excited, so the Senatorial situation is a mere doubt that it ever was.

Mr. L. Ed. Pearce, formerly of this city, is spoken of for appointment as City Auditor by Mayor Birrell of Lexington.

By the bursting of an arch pipe on a C. and O. engine at Foster Saturday Charles Talmage, brakeman, was seriously scalded and C. K. James, fireman, slightly injured.

The gross earnings of the L. and N. for the fourth week in November were \$538,015, an increase of \$4,771 over 1904, of \$31,108 over 1903, but still \$46,769 short of 1902, the last Republican year.

In September, 1892, Joseph Hartwell Cabell, one of the brightest young lawyers of Cincinnati, and Miss Florence Swig, the accomplished daughter of Judge Peter F. Swig of the same city, came to Mayville and married; and now Mrs. Cabell is seeking a divorce in the Cincinnati court.

A dispatch from Cynthia says James G. Wall, brother of Mr. R. M. Wall and cousin of E. Berry Wall the ex-prince of New York City, received a fall last Wednesday on the street. At a consultation held Saturday evening it was decided that his chance of recovery is slight. He has been the Clerk of Harrison county eight years.

TOLD BY BANKERS.
Stories That Prove That Banking Is Not Always Pleasant.

"Human recalcitancy seems to have reached its limit of impudence," said J. O. Cannon, Vice-President of the Fourth National Bank, New York City. "I have not heard of any new methods of bank swindling for some time. The same old games of raised checks, signing the names of cashiers on the back of paper and similar devices are still being tried now as in years past. We have reduced this class of swindling to the minimum in New York by asking some very pointed questions and by insisting upon the identification of strangers. In the matter of forged papers the most keenly watched paying teller is sometimes outwitted in New York and other large cities, but very seldom. Taking into consideration the amount of money that in ordinary times of business passes over the counter in a New York bank in the course of a day, the amount of fraud committed in the course of a year is very small. The swindlers, such as the check raisers, etc., have of late been confining themselves largely to interior banks, but even with them of late they have been particularly unfortunate. Then, too, we have reduced the loss of money to a minimum as far as check thieves are concerned. You rarely hear nowadays of men walking into banks in the East and picking up a package of \$10,000, \$15,000 or \$20,000 and then disappearing successfully. We now keep our banknotes behind iron gratings, where it is exceedingly difficult to 'graft' them, to use an expression among thieves. Another thing that has reduced the looting of banks to the minimum is the detection, swift and persistent manner in which the banking associations hunt down criminals. We spare neither time nor expense in hunting them down, and we are sworn when caught and convicted to the minimum is the detection of them. When released we see to it that their every movement is watched. Every forger, check raiser and sneak thief known to the law is under continuous surveillance in all of our large cities, and, under the Berillon system, if one of this class comes a crime elsewhere, he can be easily identified."

"None of us wish to go through with the experiences of 1903," said William Hackett, Cashier of the Eastern National Bank of Evans, Pa., "and yet there are some collections which the public which are not displeasing. I remember one bank which was obliged to close its doors, and which gave a very truthful explanation of the cause in a notice on the door reading as follows:

"The liabilities of this bank are \$77,000. The assets of this bank are \$67,000. The public owes the bank \$10,000. When the public will pay this bank we will be able to do business."

We wish to make the distinct announcement that this bank is not busted; the public is busted."

WE'RE FOR AMERICANS!

The theoretical tariff makers told
 us voters in 1892 that Protection was
 a Chinese Wall that kept our farmers
 from selling their
 products in the

"markets of the
 world"—wherever
 they are. These
 political wisecracks
 told the voters also

that Free-trade was the only salvation
 of the industrial interests of this country—
 and enough voters were fooled into
 those beliefs to elect CLEVELAND and secure
 a Free-trade tariff.

Well, we've had a fair trial of the Free-
 trade fad; and, as the Republicans con-
 tended, it has been a most disastrous
 experiment. Instead of benefiting America,
 it has benefited England; and instead of
 bringing prosperity to American farmers
 and manufacturers, it has damaged them
 to the detriment of their competitors
 across the water. This fact is fully
 shown in the following editorial from
 The London Financial News of October
 8th, which is in strange contrast with
 the claims set out by the Democratic
 yawpers:

"Once more the Board of Trade re-
 turns are of a gratifying character, and
 the improvement has, fortunately, occur-
 ed all around. The imports of the
 month were worth £30,618,854, an in-
 crease of £378,303, or 1.25 per cent.
 There still remains a deficiency on the
 nine months; but the figure has been
 reduced to £962,301. Had it not been for
 the lower price ruling for wheat
 and cotton throughout the greater por-
 tion of the year, this decrease would not
 have to be recorded; for in bulk the im-
 port trade of the nine months has exceed-
 ed that of 1904.

"Likely, our exports have been ad-
 vancing by each leap and bounds that
 the lower range of prices has not affect-
 ed their monetary value to any extent
 as it has the imports. For the
 month the gain is £1,982,030, or 10.58 per
 cent., and for the nine months the aug-
 mentation reaches £5,167,590, or 3.19 per
 cent. One rather odd feature about
 those figures is the fact that one-half
 the increase comes under the head of
 yarns and textiles, although our
 department of our textile fabrics has
 been very hardly hit. The great pro-
 portion of the wool trades has, fortun-
 ately, more than offset the retrogression in
 cotton, though that reflection brings
 small consolation to Lancashire.

"The total gain for the nine months
 under yarn and textiles is £3,307,675,
 and the value of woolen fabrics sent
 by the United States has been about \$1-
 750,000, or of worsted tissues nearly
 \$1,000,000 greater than in 1904, no sur-
 prise search for the origin of the im-
 provement in the trade returns need be
 made.

"The lowering of the American Tariff
 has been our salvation, and it cannot be
 said that we have shown much reason-
 ings, for instead of taking the in-
 creased value of our shipments across
 the Atlantic in kind, we seem to have
 bought less American produce. It is
 needless to go beyond our own Board of
 Trade returns to find an explanation of
 a good deal of the monetary trouble in
 the United States.

"Practically every penny that was
 subscribed here toward the recent Ameri-
 can loan has been got back through the
 expansion in the exports of woolsens and
 worsteds, but the United States has not
 confined her increased purchases to those
 articles. Last month she bought less
 raw wool than in September, 1904, but
 had to pay more for it. She took more
 cotton pieces, more iron, more alkali and
 more of many articles which need not
 be specified. In some instances the rapid
 growth of the preceding months was re-
 sumed in a slight check in September,
 but in all these cases the figures of the
 nine months show a big advance on
 1904.

"On the other hand, we have paid a
 good deal less for American wheat, flour,
 hams, ham, cheese, lard and cotton, to
 mention only those articles in which the
 contraction is most apparent. The fact
 that the Argentina wheat has been the
 United States in respect of wheat is not
 without significance.

"When the British balance between the
 imports and exports is seriously affected

by against the former, and it would re-
 quire a large and regular transference
 of securities from New York to London
 to redress this tendency and restore the
 former position. And with India, Ar-
 gentina and Australia keeping up and
 even improving their position as pur-
 chasers of wheat in this country, with Ar-
 gentina sending more to the United
 States and the Americans to regain their
 old footing in our market.

"Last month India and Argentina
 sent us more wheat than the United
 States, and Russia and Romania together
 also topped the American figures. These
 are all factors that must be borne in
 mind in judging the outlook in the
 United States, and it is unfortunate that
 they are so consistently overlooked in
 that country itself. The increase in the
 purchase of British manufactures may
 not be maintained, but on the other
 hand, the United States must count on
 the competition in wheat and maize be-
 coming more and more intense as the
 time goes on."

All records in these states were broken
 by the vote in Maryland and Kentuck-
 y in the recent elections. In Mary-
 land the vote was \$7,000 greater than
 was ever polled in that state in a Presi-
 dential year, and in Kentucky the high-
 est Presidential vote was beaten 17,000.
 The Democrats did well, but they were
 largely outvoted, and they will be out-
 voted as long as the Republicans continue
 to put up a better Government.

If the Republicans carry at many
 states in 1906 as they carried in 1904
 and 1905, they will have as large a ma-
 jority in the Senate in proportion to
 numbers as they now have in the House
 of Representatives. On the 4th
 of March, 1899, there would only twenty
 Democrats in the Senate out of sixty,
 and it would take the Democrats eight
 years of successive triumph to again re-
 gain the ascendancy. This is a beauti-
 ful prospect for Democratic Editors to
 contemplate.

The Kentucky Court of Appeals has
 just decided in a case growing out of
 the proceedings of the City Council of
 Paducah that "those present, as shown
 by the roll-call or otherwise, may be
 counted to make the quorum, but if they
 do not vote they must be deemed to ac-
 quiesce in the action of those who do
 vote." This vindication of ex-Speaker
 REED by a high Democratic judicial tri-
 bunal should tend to settle the asperity
 of those who have been so fond of stig-
 matizing him as a Carr.

The net gold exports are climbing up
 close to 1894's figures. They amount for
 the year thus far to about \$57,000,000,
 while at this time in 1894 they were
 around \$60,000,000. There is a very
 strong probability that the latter mark
 will be exceeded in the next few weeks.
 This year's record in gold output will
 be hard to beat. And so it will continue
 as long as Americans follow the lead
 of the Free-traders and buy goods made
 in Europe instead of buying goods made
 in America. The American manufacturer
 will gladly accept greenbacks, National
 Bank notes or silver for his goods, but
 the European manufacturer demands
 gold; and that is why so much of Uncle
 Sam's yellow metal is going across the
 ocean.
